

ModuleWorks

Get There Faster.

Your career at ModuleWorks

ModuleWorks develops software components for the CAD/CAM industry that are used to control and simulate CNC machines and robots. With over 170 employees and more than 70% of the global market share, ModuleWorks is the leading company in this sector. To strengthen our team, we are looking for a

C++ Developer (f/m/d)

Job description

As a contractor, you will be in charge of designing, implementing and improving the state-of-the-art toolpath calculation algorithms. You're expected to work with specifications, provide estimates and communicate to internal stakeholders.

We are a team of software developers working on algorithms for geometric calculations. We use sophisticated mathematical concepts, data structures, and algorithms as well as modern development tools. Our software is used in computer-controlled production processes, and we continuously strive to offer our customers new possibilities in this field.

What you can expect from us

At ModuleWorks you will find a friendly working atmosphere in an international and young team. We do not believe in strict structures and rigid ways of thinking, but instead offer diverse tasks and encourage flexible development that goes beyond flexible working hours and home office. Interested? Then get in touch with us! We look forward to your application.

Only complete applications will be accepted for the application process.

Your profile

- Good knowledge of C++
- Mathematical background
- Intermediate English
- CAD/CAM experience would be an advantage
- Knowledge of computational geometry algorithms, 3D graphics
- Multithreaded programming skills
- Software architecture in large projects

We offer

- Competitive compensation
- Regular salary reviews
- Flexible working hours
